

St Chad's Church, Pattingham with Patshull

North Aisle Project

Proposals for chairs and tables

The objective of the proposed reordering of the North Aisle is to create a welcoming space which can be used for a number of purposes. These include providing a space within which refreshments can be served and consumed after services and on other occasions, providing a space for small groups to meet for prayer, worship, study or other purposes and also providing seating as part of the whole church for services, particularly those with a large attendance. To support all of those purposes we need chairs and tables which can easily be moved and stored when not being used as well as being appropriate for use in this grade II* church.

In the selection of the chairs we have had regard to the guidance on Seating in Churches issued by the Church Buildings Council and to the comments of the Diocesan Advisory Committee when they considered the original version of this proposal in 2022. We have sought to identify chairs which are wooden, not upholstered, appropriately dignified for use in services, stackable and light enough to be handled. The Theo Chair from Trinity Church Furniture meets all of those criteria and there is a trolley which can be used to move the stacks of chairs when needed. The details are attached. More information can be found on the website at <<https://trinitychurchfurniture.co.uk/products/theo-chair/>>. We would select a colour to match or complement the wood used for the screen and kitchen cabinets.

In relation to the tables there is no specific guidance from the Church Buildings Council but some of the guidance on seating is applicable. We have sought to identify tables which have tops which are of wood or have the appearance of wood, that are of an appropriate size to be used for small groups in the space available and whose overall quality and appearance is appropriate for the setting. They also need to be capable of being stored in the store cupboard which is included in the plans near the proposed kitchen.

Whilst we have been able to make a decision about the chairs we have not been able to make a firm decision about the tables at this stage. There would be advantages in leaving a firm decision until the project is closer to completion when it would be easier to see how the chairs and tables might be arranged in the space available. That might affect the size and number of tables required.

There are several types of table which we have considered and we have identified two particular designs which in different ways may be appropriate for our needs as currently identified.

One is the "B-310R" Round Folding Wooden Conference Table from Kirkhouse. There are also rectangular, square and half round options available. Details are attached. More details are available on the website at <<https://www.kirkhouse.co.uk/b-310r-round-wooden-folding-table.html>>.

The other is Connex NEXT DAY Half Moon Folding Table from Online Reality. These could be used in pairs to produce round tables or separately as circumstances may require. Rectangular versions appear to be available. Details are attached. More details are available on the website at <<https://www.onlinereality.co.uk/prod/connex-next-day-half-moon-folding-tables>>.

We would invite the DAC to approve the choice of the Theo chair and to offer any appropriate advice in relation to the choice of appropriate tables.

Theo Chair

Designed specifically for churches and cathedrals by British designer Simon Pengelly, Theo is a lightweight, strong and durable wood framed high density stacking chair with a veneered plywood seat and back.

Theo has won numerous awards including the Church of England's 'Design a Church Chair' competition and has been recognised by the Worshipful Company of Furniture Makers as an outstanding lightweight stacking chair.

The Theo chair is complemented by a range of matching Theo products including tables and pews.
