

**St Chad's Church, Pattingham with Patshull
North Aisle Project**

Supplementary Information for Petition

C. FINANCIAL INFORMATION

The estimated cost of the project is about £100,000 although this is a rough estimate provided by the architect.

The PCC has funds already available of about £31,000 which can be used for the project.

It is expected that the balance of the cost will be covered by the Pattingham Church Estate Trust. The trustees are committed to covering the cost of the project, the purpose of which is entirely consistent with the terms of the Trust and such a payment is well within the capacity of the Trust.

In the unlikely event that the trustees decide not to cover all or part of the balance of the cost the PCC does have sufficient reserves which would allow it to cover the costs out of its own funds although it might then have to delay other projected expenditure.

H. DETAILS OF CONTRACTORS

No contractors have yet been identified for the work. Once the faculty is granted the architect will arrange for tenders to be obtained from prospective contractors.

I. TIME FOR WORK

It is hoped that the tendering process will be started as soon as the faculty is granted so that the work can be started as soon as possible.
